

Process of standard development (new or revised)

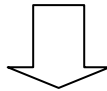

- a) Review of International and national literature
- b) Review of previous standard of various accreditation programmes by Technical Committee

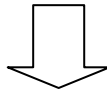

- a) Feedback on regular basis as well as need based from stakeholders (hospitals, assessors and committee members) and other subject matter experts.
- b) Analysis of most common NCs raised during assessments.

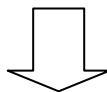

Compilation of feedbacks

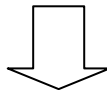

Deliberations and discussions by Technical Committee members (including invited experts)

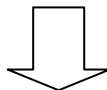

Draft standards are prepared based on above inputs

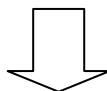

Draft standards are put up on the public domain (NABH Website) for public and stakeholder feedback

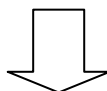

Public and stakeholder feedback received on draft standards and analysed

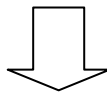

Further Deliberation and discussions by Technical Committee on the above feedbacks

Final Draft standards prepared

Approved by board

Final standards
